About pet project

Topic: File storage service
Requirements for the project

- 1 The solution must have a three-layer architecture.
- 2 The interface should be a separate application using HTML, CSS, Angular.
- 3 Access to the functionality of the application services should be organized through the WEB API.
- 4 Use Entity Framework Code First for access. Use MS SQL as a DBMS
- 5 Provide validation of user input.
- 6 Pay attention to the speed of the project, freezing of the interface when performing data loading, filtering, sorting operations are undesirable;
- 7 The code should be organized so that it can be reused and relatively easy to replace the implementation of logical parts;

Main Skills

.Net / C#

MS SQL Server

HTML / CSS + JS

Angular + TypeScript

PHP

I live in Kharkov

Ready to move

Some information

I have no experience in commercial development.

More focused on back-end development, but it would also be interesting to try myself in a full-stack direction.

I think that have developed enough to find my first job.

Extra Skills

ASP.NET CORE

WinForms / WPF

SOLID, OOP

GOF, MVVM, MVC, REST API

ADO.NET / EntityFramework

NUnit, MockFramework

GitHub

JQuery

Json / XML

Some experience with JWT / Identity

Personal Skills

Communicative

Team worker

Responsible

Punctual

Critical thinking

Positive attitude

Education

- Aug 2021 - Now
• **Kharkov Aviation Institute**
• Speciality: Computer Science
- Nov 2020 - Now
• **IT STEP Academy**
• Speciality: Software Development
- Sep 2017 – Jun 2021
• **Kharkov Radio Engineering College**
• Speciality: Computer Engineering
• Diploma: Without triples
